Nobel Laureate and Chief Adviser to the Government of Bangladesh – Professor Dr. Muhammad Yunus

A proud moment for our entire team—our Founder & CEO, Medina Ali, had the honor of presenting Dr. Chashi's journey and impact to **Professor Muhammad Yunus**, Nobel Laureate and Chief Adviser to the Government of Bangladesh.

As Bangladesh's first AI-powered digital farming platform, we're committed to revolutionizing agriculture through innovation, inclusion, and technology. This meaningful recognition is a testament to the work we've been doing to uplift rural communities.

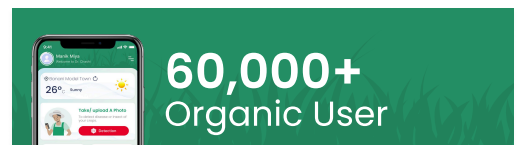

Special thanks to the SME Foundation for nominating us and for their continued support of homegrown innovation.

Honored at the 'Future of Capitalism' Startup Competition

We're thrilled to announce that Dr. Chashi was awarded Second Runner-Up at the prestigious 'Future of Capitalism' startup competition!

Even more exciting, this win comes with an incredible opportunity to work closely with the **Leo Lion Foundation**, a global leader in mentoring purpose-driven startups. We're eager to learn, grow, and scale our impact with their support.

60,000+
Organic User

Dr. Chashi Team at Youth Entrepreneurship Expo Segment of Bangladesh Investment Summit

Dr. Chashi Reaches 60,000+ Organic Users

We're proud to announce that Dr. Chashi has surpassed 60,000 organic users, including farmers from Bangladesh, Saudi Arabia, and Malaysia.

This growth—achieved without paid marketing—highlights the real value & brings to farming communities across borders.
