Dr. Chashi's Team Participates in National Workshop on Gender Framework for ACASA Technologies

Dr. Chashi team proudly took part in the **National Workshop on Building a Gender Framework for ACASA Technologies**, held at the **Bangladesh Agricultural Research Council (BARC)** in Dhaka on 4th March 2025. The workshop was organized under the banner of the **Atlas of Climate Adaptation in South Asian Agriculture (ACASA)** initiative, with a focus on promoting inclusive innovation in agricultural technology.

Data & Field Activity

This March, the Dr. Chashi project continued its AI-powered field data collection in Narsingdi and Manikganj. Our team expanded the scope of

data collection to include watermelon, sunflower and sesame.

By capturing high-quality images of key crop diseases and pests in real-world conditions, we're fine-tuning our AI models to boost accuracy in disease detection. This real-time field-validated data will be integrated into the Dr. Chashi platform.

Iftar Program Celebration at Genius Farms Ltd.

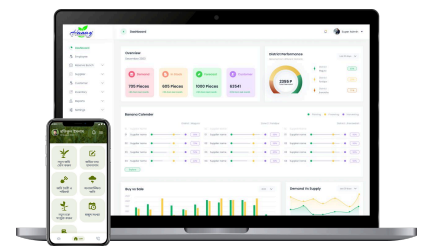

We are delighted to share moments from our Iftar Program, held on Wednesday, 19th March, at the Genius Farms Office Premises.

Dr. Chashi was featured on Daily Star
